Graduated with Distinction

Coursera

Google UX Design Professional Certificate, 2023

Experience

UX/UI Designer / MetricLy Technologies Corporation

Jul 2025 – Jul 2026, Saskatoon, SK

- Position: Led UX/UI design for two connected startup platforms, creating end-to-end product experiences in Figma and Claude Design including design systems, flows, wireframes, prototypes, and high-fidelity UI while collaborating on AI-powered features.
- Impact: Improved design consistency, usability, and cross-functional alignment through scalable systems, iterative testing, and production-ready design delivery.

Product Developer / Pathfinder365

Sep 2023 – Apr 2024, Saskatoon, SK

- Position: Supported UX research, interface design, and full-stack development for a tourism platform in a startup environment.
- Impact: Improved usability and product direction by integrating user research insights into design and implementation.

Collection History and Web Project Lead / Snelgrove Gallery

Nov 2021 – Apr 2023, Saskatoon, SK

- Position: Managed website updates and digital content for the University of Saskatchewan Art Galleries and Collection using Cascade CMS. Coordinated with IT teams and internal stakeholders.
- Impact: Improved accessibility and usability of the gallery's website. Increased consistency across web pages. Streamlined content update workflows and reduced maintenance friction.

Development Team / Shared Spaces

Sep 2019 – Jun 2020, Saskatoon, SK

- Position: Contributed to design and development of an augmented reality application focused on arts experiences in SK through research, prototyping, and usability testing.
- Impact: Strengthened product validation and improved concept clarity through iterative user feedback and testing. Supported successful public presentation of the AR concept at the Ten Digit Technology conference.
